SUPPLEMENTARY INFORMATION:

I. Abstract

The Department of Commerce is below parity with the relevant civilian labor force representation for many of our primary occupations. The only method to determine if there are barriers in the recruitment and selection process for these occupations is to track groups

that apply and how they fare through the selection process. Without this information, DOC does not have the ability to evaluate the effectiveness of its recruitment efforts, or to determine barriers in its selection process. There is no other objective way to make these determinations, and no source of this information other than from applicants.

The race and national origin (RNO) information of job applicants was previously collected by all Federal agencies using OPM Form 1386. The form expired several years ago and DOC is seeking to establish a replacement form. It will not be a required part of their application package. A number of Federal agencies have already recreated this form for the same purpose—collecting race, national origin, gender and disability information of job applicants.

The information is not provided to selecting officials and plays no part in the selection of individuals. Instead, it is used in summary form to determine trends over many selections within a given occupation or organizational area. The information is treated in a very confidential manner.

II. Method of Collection

Initially job applicants will complete the form in a paper version and submit it with their application. DOC is in the process of automating this form. Applicants should have the option of completing the form electronically within a year. Those without access to automated applicant processing will be able to continue submitting a paper version. Job applicants complete the form on a voluntary basis.
